TO WHOM IT MAY CONCERN:

I am writing to commend Don Reist and Tutorwiz Education Centre for the help and dedication which has led to a strong positive impact on my son. Since coming to Tutorwiz, my son's self confidence and self esteem has increased immensely. He is much more enthusiastic and eagerly looks forward to his weekly sessions.

Don's and Tutorwiz's expertise in the area of Assistive Technology Computer Applications, as well as Don's Specialist Designation in Special Education fill a huge void in the area of education, particularly for kids with special needs.

Understanding the frustration and behaviours many of these children struggle with is challenging. Don's patience, experience and commitment shine through in his ability to connect with these children. His belief that children learn better while having fun has led him to develop an environment in which students blossom and strive. Tutorwiz is much more than a learning centre. It is a community in which all children with learning difficulties and their families are welcomed. This is particularly apparent during the March Break and Summer Computer camps. The camaraderie which exists at these camps is incredible. It is very rare to find an environment in which children are hesitant to leave even though they've been there the entire day. Tutorwiz also goes above and beyond to accommodate busy family schedules.

In closing, I wish to state that Tutorwiz is a great asset for children with special needs and their families. It provides a much needed service in the community and does so with commitment, flexibility and professionalism.

Sincerely,

Bonnie Littley
Regional Councillor
Ward 1
