

Hi Don,

This is a letter to let you know what a wonderful difference you have made for my son Daniel.

Daniel as you know has had so many challenges that have made his experience at school very frustrating for him. Daniel was born with something called Speech Aphasia. Because of this problem Daniel had difficulty early on with speech. Daniel's speech slowly developed with the aid and guidance of a speech pathologist.

Daniel has also had secondary learning difficulties and fine motor issues that have caused him a fair amount of distress. These two obstacles have made this little boy's school experience a frustrated one.

As much as Daniel's dad and I have tried to help with Daniel's educational development, it has not been an easy process. After several years of much struggle and much frustration, we came to realization that we needed some professional help if Daniel was going to succeed in school. A friend of the family, recommended Tutorwiz....and we have been so happy ever since.

Daniel, prior to Tutorwiz was not a happy child. He was so frustrated with school and learning, everything became too overwhelming and he became so discouraged with himself and learning. Daniel had a difficult time settling down and focusing on learning.

However after a short time with Tutorwiz, Daniel began to settle down. He stopped feeling the same level of anxiety and started enjoying the whole learning process. His confidence and his ability to learn increased.

Daniel is a whole new kid, more relaxed and motivated about learning. Tutorwiz has been a huge success for Daniel and for us.

Kind Regards,

Olivia Sultana
